Air Conditioning & Heating

ENERGY EFFICIENCY IS THE KEY...

...TO CONTROLLING THE COSTS OF HEATING YOUR HOME

Provide your family with temperature-consistent heating comfort they can depend on.

As a homeowner, you try to find a balance between your family's comfort and your monthly energy costs. Introducing the Goodman® 80% AFUE Gas Furnace. It's one of the most impressive furnaces we make, and we built it with your comfort in mind.

PRECISE ROOM-TO-ROOM TEMPERATURE CONTROL

Unlike conventional, single-stage furnace technology, Goodman's Dual\$aver technology eliminates the temperature swings resulting from abrupt, high-stage stops-and-starts of the furnace by operating at a low heating stage the majority of the time. This enables your Goodman GME8 furnace to gradually and pleasantly increase the temperature of your home environment. And if low-stage heating doesn't warm your home to the desired temperature quickly enough, Dual\$aver shifts your furnace into high stage to ensure your comfort.

QUIET OPERATION

Your Goodman GME8 80% Furnace uses a two-stage gas valve and a high-efficiency circulating blower to reduce the noise levels common in other furnaces. Since this unit runs in low-heat stage 90% of the time, the impact of the normal high-fire sound is eliminated 90% of the time.

Unmatched performance, efficiency and affordability. That's just what you'll get with Goodman.

Energy Star® Climate Zone	City in Climate Zone	80% AFUE Savings over 60% AFUE
4	Seattle	\$1,569
6	Minneapolis	\$1,324
5	Newark	\$1,242
4	St. Louis	\$1,066
3	Atlanta	\$895

- 1) The higher the AFUE, the greater the efficiency – and the lower the operating cost. AFUE (Annual Fuel Utilization Efficiency) is the industry measurement used by the Department of Energy.
- 2) These figures represent the heating cost savings of a 90,000 BTUH system at \$1.415/Therm and are based on formulas published by the DOE and EPA.
- 3) These figures are for comparison purposes only. Actual savings will vary according to personal use habits, square footage, location, how your unit is installed and the construction of your home.

YEAR-ROUND ENERGY SAVINGS

Energy efficiency is key to controlling the cost of heating of your home. This furnace's high efficiency circulating blower and two-stage gas valve reduces operating costs and advances home comfort by reducing temperature swings and stratification from floor to ceiling. And an 80% AFUE rating means 80 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of the gas burned contributes to your home's heating.

The remaining 40 cents is lost energy – wasteful and expensive. Switching to a Goodman 80% furnace cuts that loss in half.

INDOOR AIR QUALITY

This furnace's high-efficiency circulating blower slowly circulates the air throughout your home, gently passing the air over your filters more often and therefore creating cleaner indoor air.

QUALITY MANUFACTURING BACKED BY WARRANTIES AND SERVICE

RELIABILITY AND LONG LIFE

The heart of any furnace is the heat exchanger. Our patented aluminized-steel tubular heat exchanger has been tested to the highest industry standards. We guarantee their performance and back them with a **Lifetime Limited Warranty**.^{*} The unit can fit any upflow/horizontal application, has a durable Silicon Nitride Igniter, and has integrated controls with diagnostics, plus a combination redundant gas valve and regulator for further safety and reliability

GUARANTEED WARRANTIES

We guarantee your Goodman 80% AFUE Multi-Speed Furnace with one of the best warranties in the industry.

In addition to covering the heat exchanger with a **Lifetime Limited Warranty** to the original, registered homeowner, we guarantee that **if the**

heat exchanger fails during the first 10 years of ownership, we will replace the entire unit.

This Goodman furnace also has a full **10-Year Limited Warranty** on all other functional parts.

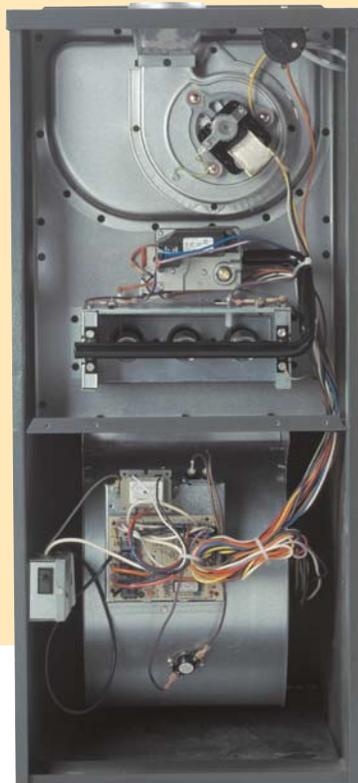

For even greater protection and worry-free ownership, ask your dealer about **GoodCare**.[®]

IMPRESSIVE FEATURES AND BENEFITS:

GOODMAN 80% AFUE GME8 TWO-STAGE (CONVERTIBLE) GAS FURNACE

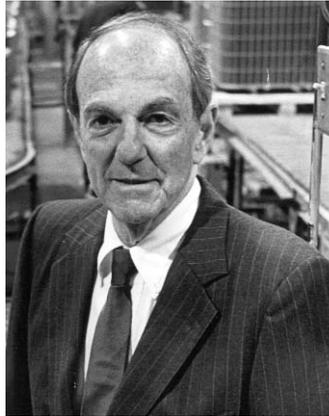

- 10-Year Unit Replacement Limited Warranty
- Lifetime Heat Exchanger Limited Warranty
- 10-Year Parts Limited Warranty
- Aluminized-Steel Tubular Heat Exchanger
- Corrosion-Resistant Vent Blower
- Two-Stage Gas Valve
- Durable Silicon Nitride Igniter
- Powder-Paint Finish
- Fully Insulated Cabinet
- Electronic Ignition Control w/Dual\$aver Technology
- Energy-Efficient Motor (EEM)

Thank goodness for Goodman.™

GOODMAN: THE RECOGNIZED INDUSTRY LEADER

Every Goodman heating and air conditioning system is designed, engineered, and manufactured with pride. All employees follow strict, quality-driven processes to ensure that all Goodman products offer the legendary performance that has made the brand a recognized leader in the industry. This attention to quality has resulted in the Goodman family of companies becoming the second largest manufacturer of residential air conditioning and heating systems in North America.

The legacy began when Harold Goodman, a former air conditioning contractor, felt that he could build a better product. His goal was to manufacture air conditioning and heating equipment that performed more reliably, lasted longer than the competing products, eliminated time-consuming installation problems, and make air conditioning and heating products as affordable as possible.

Harold accomplished his goal and today the Goodman family of companies manufactures heating, air conditioning and ventilating equipment in modern facilities located across the United States.

Air Conditioning & Heating

Our continuing commitment to quality products may mean a change in specifications without notice.
